Cott Systems' case management solution launches in West Virginia

WORTHINGTON, OHIO – February 11, 2010

Cott Systems announced today that Boone County, West Virginia has joined the growing number of counties selecting **Verdict**-Cott Systems' Case Management solution and will be the first county in West Virginia to experience *Verdict Probate*. Cott Systems founded in 1888, is not a newcomer to the state – counties have been using *resolution*, Cott's land records management software for many years.

In West Virginia, more and more county clerks are looking to utilize the latest technologies for managing their probate cases. Boone County, already utilizing *resolution* for their land records solution, was looking for ideas for their managing their probate records. "We have a need and Cott now has the solution," said Gary Williams, County Clerk in Boone County West Virginia. "We are very excited to begin using *Verdict*".

After a review of multiple states to release *Verdict*, it was determined that West Virginia was a great fit. "Our *Verdict* system has been very successful and popular in Louisiana, Nathan Dille, Product Manager for Cott Systems explained. "When we looked at what Clerks in West Virginia do to manage their probate cases – it just made sense to bring *Verdict* to West Virginia."

Verdict, a fully integrated Case Management system, built on the latest Microsoft® .net technology that gives your office total freedom of workflow preferences and a robust case search that will have your employees and public thanking you for choosing Cott, is now available for any county in West Virginia looking to take the next step in technology. The new solution not only gives offices a wide range of workflow options, but will also give the office the opportunity to utilize new optional technologies and services like *AutoRedaction* for sensitive or classified information, *eRecording*, *eBackup* (Disaster Recover Service), *eCommerce*, and more.

About Cott Systems

Cott Systems, an innovator in public records management for over 120 years, is a leader today in technology solutions and services for recording, imaging, and searching court and land records across 19 states. Through an important research and development process, which includes significant customer involvement, Cott is driving new technologies and services for local governments by employing up-to-the-minute information and workflow automation, data management and migration, backfile conversions, document redaction services and hosting and disaster planning services. Headquartered in Columbus, Ohio, Cott specializes in understanding and responding to local government information management needs across the country by building a partnership with their customers and the public that they serve.
