## Jefferson County Clerk, public see increased efficiencies with new land records solution.

**WORTHINGTON, OHIO – January 28, 2010**

Cott Systems announced today that the Jefferson County Clerk’s office (New York) is the first office in the state to utilize the newly available records management solution, resolution<sub>3</sub>, to cashier, index, scan and make county records available for search.

Jefferson County Clerk’s office moved forward with resolution<sub>3</sub>, Cott Systems’ latest solution for county clerks because of the efficiencies it would offer both to her staff, but also those who search her records in her office. “We try to offer our services in a timely manner, but the amount of time resolution<sub>3</sub> saves us makes it all worth it,” said County Clerk, Cheryl Lane.

The new solution also offers the latest in records search capabilities. Standard with resolution<sub>3</sub> is the latest in records searching technology, eSearch. Each searcher is set up with a user name and password and then is able to access the advanced features of the system. “By allowing each user to set up their own sign-on, it gives them each an opportunity to ‘customize’ their searching experience,” said Bob Mains, VP of Technology and Services at Cott Systems. “We were careful to listen to our customers and their searching public to build eSearch according to their current needs and keeping ahead of technology for tomorrow”. eSearch can be accessed by visiting the County Clerk’s office.

Resolution<sub>3</sub> is now available for the entire state of New York. The new system not only gives the County Clerk’s office a wide range of workflow options, it also gives them the opportunity to utilize new optional technologies and services like AutoRedaction for sensitive data, eRecording, eBackup (Disaster Recovery Service), Web Hosting, eCommerce, and coming soon, eFiling.

### About Cott Systems

Cott Systems, an innovator in public records management for over 120 years, is a leader today in technology solutions and services for recording, imaging, and searching court and land records across 19 states. Through an important research and development process, which includes significant customer involvement, Cott is driving new technologies and services for local governments by employing up-to-the-minute information and workflow automation, data management and migration, backfile conversions, document redaction services and hosting and disaster planning services. Headquartered in Columbus, Ohio, Cott specializes in understanding and responding to local government information management needs across the country by building a partnership with their customers and the public that they serve.
